PROJECT DOCUMENTATION: CAMPUSCONNECT

College Event Information System

SINGLE PAGE APPLICATION • ACADEMIC PROJECT

1. Project Overview & Objective

CampusConnect ek lightweight, responsive Single Page Application (SPA) hai jise college events, cultural programs, aur sports tournaments ki details ko centralized tarike se handle karne ke liye design kiya gaya hai. Is application ka main goal students aur faculty ke beech event updates aur communication ko seamless aur fast banana hai.

2. Theme Palette & Typography

Website ko modern, accessible aur visual depth dene ke liye professional color scheme aur typography select ki gayi hai:

Primary Font Family: `'Poppins', sans-serif` (Google Fonts — Weight: 300, 400, 500, 600, 700)

Color Theme Palette:

Header & Footer #1a252f	Accent (Amber/Gold) #f39c12	Primary Banner Blue #3498db	Action Buttons Green #27ae60	Badges/Highlights Red #e74c3c
Background Light Gray #f4f6f9	Card Background #ffffff			

3. Team Members

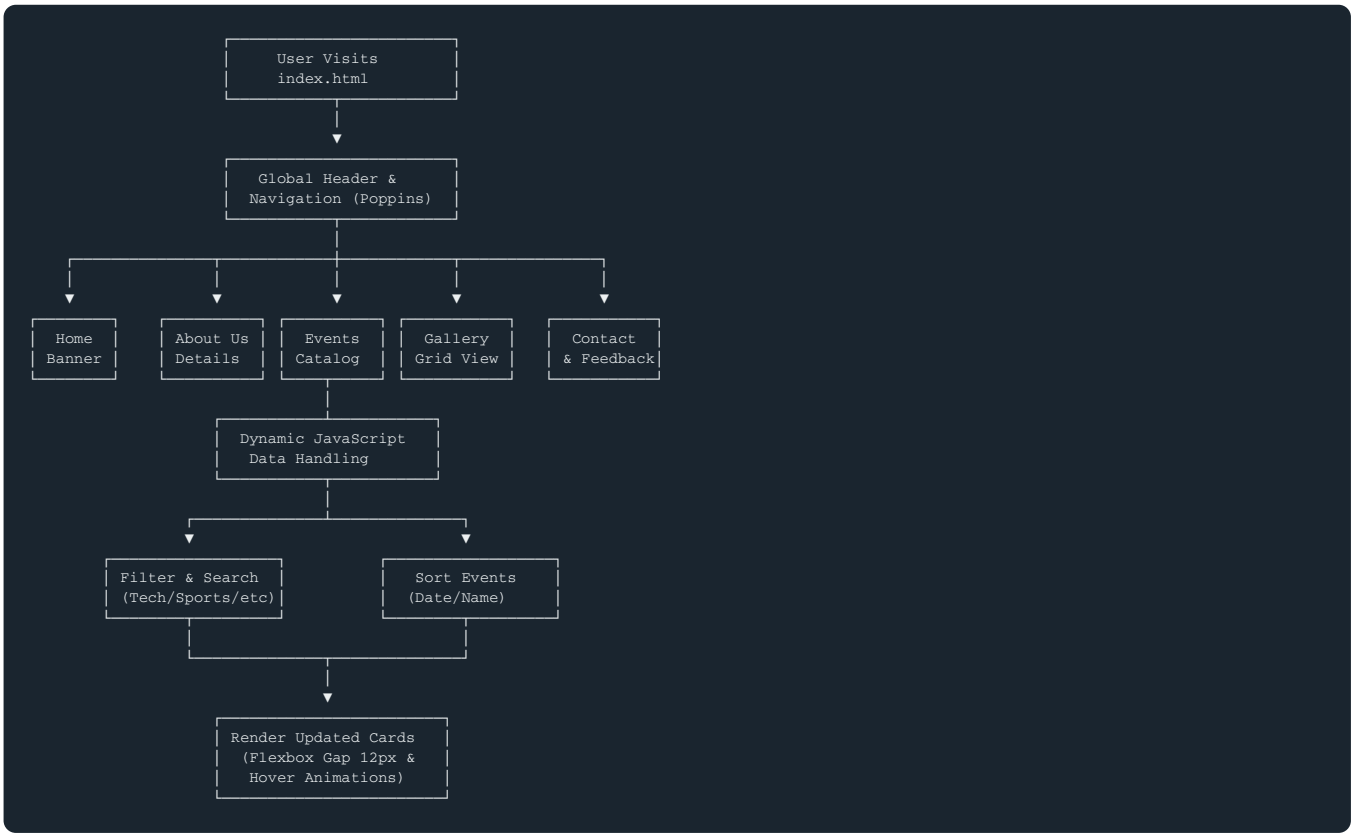

- Hasnain Riaz
- Saboor Mughal
- Sanawar Ali
- Sheroz Samoo

4. Tech Stack & Architecture

- **Frontend Structure:** HTML5 (Semantic Tags)
- **Styling & Layout:** CSS3 (Flexbox, CSS Grid, Modern Responsive Media Queries)
- **Typography & Styling:** Google Fonts (Poppins), Dynamic Hover Effects & Transitions
- **Scripting Core:** Vanilla JavaScript (ES6+ / Dynamic DOM Manipulation)
- **Data Storage:** JavaScript Data Object / Array Structure (`events.js`)

5. System Application & Navigation Flowchart

Website ki operational Single Page Application (SPA) workflow layout neeche di gayi diagrammatic flow ke mutabiq kaam karti hai:

6. Key Features & Implementation Details

1. **Single Page Architecture (SPA):** Without page refresh, user smooth transitions ke saath Home, Event Catalog, Gallery, Feedback, aur Contact sections par navigate kar sakta hai.
2. **Dynamic Data Rendering:** Direct array dataset (`events.js`) se live JavaScript logic ke zariye elements create hote hain.
3. **Real-time Search & Filter System:** Title search aur Multi-category filtering (Technical, Cultural, Sports) support karta hai.
4. **Sorting Feature:** Date ke hisab se chronologically ya alphabetical title search sort kar sakte hain.
5. **Modern UI Animations & Styling:** Smooth hover elevation, image zoom effect (`scale`), aur clean universal flexbox spacing (`gap: 12px`) integrate ki hai.
6. **Full Responsiveness:** Mobile-first approach aur media queries use kiye gaye hain taake smartphones, tablets, aur desktop screens par exact fit aaye.

7. Project File Architecture

File	Purpose
`index.html`	Main single-page application document aur global section layouts.
`style.css`	Global styling, Google Poppins import, custom animations, theme palette setup, aur full responsiveness media queries.
`events.js`	Array-based storage container (IDs, Titles, Categories, Dates, Venues, aur Image URLs).
`script.js`	Dynamic catalog rendering, SPA page switching, filter/search event logic.
`README.md`	Developer setup aur quick-start guide.

8. How to Run & Test the Application

Method 1: Direct Local Execution (No Server Needed)

1. `CampusConnect` project folder open karein.
2. `index.html` file par double click karke browser (Chrome / Edge) me open karein.
3. Refresh (`F5`) karne par saara JSON/JS data instantly load hoga bina kisi CORS restriction ke.

Method 2: VS Code Live Server

1. Project ko **VS Code** me open karein.
2. `index.html` par right-click karke **"Open with Live Server"** select karein.

Submitted for Academic & Technical Evaluation.
